Unfortunately there is no firm evidence as to the best methods to employ for the purpose of changing practices in healthcare. Increasingly, decision makers, physicians, and other users of diagnostic tests request more information than simple measures of the technical and analytical performance of the tests and their diagnostic accuracy.

It is not an easy undertaking, but potentially very valuable for the patients. Battery powered point-of-care analyzer demonstrated as ideal for operation in extreme temperatures and remote areas. Active participation in research projects, organisational and quality improvement projects is motivational.

The laboratory organisation that the present writer belongs to caters for an external quality assessment of blood glucose and hemoglobin Alc: an international survey.
